*Variable range depending on the configuration of the installation

LR-OL

The LR-OL is a garden automation programmer. It allows you to both control the lighting of your garden by dividing them into different areas but also to control the lighting and pump of your fountain or pool.

Thanks to the combination with a LR-MB gateway, the LR-OL is remotely controlled via MySOLEM app and platform. Equipped with a long-range radio LoRa™ technology, you can install it either in a garage or in a technical room located several hundred meters.

Controlled lighting = money savings realized

Avoid the non useful lighting by programming cleverly the lighting of your different areas.

Large compatibility

It is convenient and suitable for any type of lighting and for a pump by connecting the outputs of the LR-OL to the power contactor.

MySOLEM : remote control

With MySOLEM app and platform, create and modify every programming of your lighting, choose the days of functioning and send it to the LR-OL remotely.

MAKE IT SIMPLE

INSTALLATION

External Power Supply (230 VAC - 50 Hz / 24 VAC - 50 Hz)
Electrical connection terminal block
Operating temperature : from 0°C to 50°C

TECHNICAL FEATURES

4 control lines: 250 VAC / 16 A type NO
Max load distributed : 4000 W (16A)
Max load 1 line : 3500 W (16A)
Bluetooth® Smart 4.2 Low Energy

LoRa™ radio communication

Weekly programming

Programming by operating time range (up to 8 daily)
Save time clock in case of power failure : at least 10h

DIMENSIONS

Width: 11 cm
Height: 14.5 cm
Depth: 3.6 cm
